PROJECTS

Codellab-IDE (Learning Support Center – Mohawk)

Description: A web-based Python compiler intended to increase collaboration and participation between tutors and students for the Peer-Assisted-Study-Sessions (PASS) program at Mohawk College.

Project URL: codellab-ide-client.onrender.com

Stack: **PyTorch, Flask, MongoDB, Express.js, Node.js, React.js**

- Contains a synchronized Python editor supporting live updates and simultaneous typing among users
- Includes real-time chat feature using **WebSocket (socket.io)**
- Features a **Conversation AI (Python-Chatbot)** developed to answer Python related specific intents

Remembering Their Faces (Mohawk IDEAWORKS)

Description: Currently in development, this project aims to provide a website that uses facial recognition and OCR technology to filter medias collected from the National Airforce Museum of Canada.

Project URL: rememberingtheirfaces.ca

Stack: **PHP, MySQL, DeepFace, HTML/CSS, JavaScript**

- Developed a script to automate daily posts on Twitter and Facebook using their developer APIs
- Implemented **Google Analytics and reCAPTCHA** to the landing webpage
- Wrote a script to send customized emails to subscribers whenever the project goes live

VanishVault (Bell Geekfest Hackaton)

Description: A web application developed with 3 teammates at the **2023 Bell Geekfest Hackathon** that enables authenticated users to securely exchange sensitive data on the web, with the added feature of automatic data deletion once read.

Stack: **MongoDB, Express.js, Node.js, and React.js**

- **End-to-end encryption** using asymmetric encryption system
- Automated email validation and API protection using **JSON Web Token**

Quizzer (Learning Support Center – Mohawk)

Description: A REST API that generates randomized Python and Java questions for the PASS program at Mohawk College with the intent to provide additional practice material.

Stack: **Spring Boot, PostgreSQL**

- Utilized **JPA and Hibernate** to integrate a PostgreSQL database
